

Sent to Tennessee Senator Bob Corker, Lamar Alexander, and Congressman Steve Cohen:

Senator Corker, my name is Guy Cobb and I live in Memphis. I was a former Business Continuity and Disaster Recovery specialist with FedEx. I discovered a defect with a large tunnel which passes directly beneath runway 9/27 at Memphis International Airport. I have a 100 page document which explains why I believe the runway is sinking into the tunnel. I have contacted no less than 17 Tennessee State and Federal agencies, including the FBI, TBI, and US Attorney General's Office but have not received any response from anyone. When you have a moment would you please review my document which I have posted on my website at this location: [www.guycobb.com/wreg.htm](http://www.guycobb.com/wreg.htm) The name of the document is titled Hurricane Creek Master Doc and it is in a pdf format. Please review and contact me with questions. Thank you.
