

Could you please forward this information to Senior Investigator Scott Harding.

Scott,

Here is the link to the voicemail I received from the FAA's Whistleblower Program. I have called them back three times and have only gotten voicemail. I want to know specifically what these "details" were that would have prevented them from contacting me and also the specifics of when they received my information, from whom, and what the information did include. This is ridiculous that I have shown for more than five months the damage that has already taken place to the walls of the tunnel beneath Runway 9/27 and not a single person has attempted to verify it.
